

Mathematics – Oklahoma Academic Standards

acute angle	digital clock	meter	repeated
addition	difference	metric system	subtraction
analog clock	digit	millimeter	right angle
angle	dime	model	round numbers
area	division	more than	round
area models	dollar	multiplication	rule
array	edge	nickel	set
associative	equality	number	skip counting
property of	equal-sized groups	number line	shape
addition	equal to	number sentence	solid figure
associative	estimate	numerals	sphere
property of	expanded form	numerator	standard form
multiplication	face	obtuse angle	straight angle
attributes	fact family	operations	subtraction
bar graph	factor	order	sum
benchmark	foot	parallel	symbols
centimeter	formula	pattern	temperature
commutative	fraction	penny	thermometer
property of	frequency table	perimeter	three-dimensional
addition	function machine	pictograph	figure
commutative	geometric pattern	place value	triangular prism
property of	greater than	polygon	triangular
multiplication	identity property	product	pyramid
compare	of addition	pyramid	two-dimensional
compatible	identity property	quantity	figure
numbers	of multiplication	quarter	unit fractions
cube	inch	quotient	unknown
customary system	input / output	ray	value
cylinder	table	rectangle	vertex / vertices
data	interval	rectangle	volume
degrees	length	rectangular prism	whole number
degrees Celsius	less than	rectangular	width
degrees Fahrenheit	line plot	pyramid	written form
denominator	manipulatives	repeated addition	yard
