|   |                              |                              |                              |
|---|------------------------------|------------------------------|------------------------------|
| acute angle                               | divisor                      | manipulatives                | rectangle                    |
| addends                                   | edge                         | mass                         | rectangular prism            |
| addition                                  | end point                    | meter                        | remainder                    |
| algorithm                                 | equality                     | metric capacity              | represent                    |
| angle                                     | equal                        | metric length                | rhombus                      |
| angle ruler                               | elapsed time                 | millimeter                   | right angle                  |
| area                                      | equation                     | minute hand                  | rounding                     |
| associative property<br>of addition       | equivalent<br>expression     | multiple                     | rule                         |
| associative property<br>of multiplication | equivalent fractions         | multiplication               | ruler                        |
| bar graph                                 | estimation                   | non-equivalent<br>expression | scale                        |
| base of a figure                          | expanded form of a<br>number | number line                  | simplest form                |
| benchmark<br>(fractions)                  | face                         | number sentence              | solid figure                 |
| centimeter                                | fact family                  | numerals                     | square                       |
| change                                    | factor                       | numerator                    | square unit                  |
| classify                                  | foot                         | numerical patterns           | standard form of a<br>number |
| common factor                             | fraction                     | obtuse angle                 | straight angle               |
| commutative<br>property                   | frequency chart              | operations                   | survey                       |
| compare                                   | function machine             | order                        | table                        |
| concrete model                            | geometric pattern            | outlier                      | tally chart                  |
| congruent                                 | geometric shape              | parallel lines               | tenth                        |
| counting up method                        | greater than                 | parallelogram                | timeline                     |
| cubic units                               | hour hand                    | perpendicular lines          | trapezoid                    |
| customary capacity                        | hundredth                    | pictorial model              | variable                     |
| customary length                          | inches                       | place value                  | Venn diagram                 |
| decimal                                   | input / output table         | point                        | vertex                       |
| decompose                                 | inverse operations           | polygon                      | volume                       |
| degrees                                   | intersecting lines           | product                      | weight                       |
| degrees Celsius                           | kite                         | properties of<br>operations  | whole numbers                |
| degrees Fahrenheit                        | lattice multiplication       | protractor                   | wide division                |
| denominator                               | less than                    | quadrilateral                | word form                    |
| distributive property                     | line                         | quotient                     | word problem                 |
| dividend                                  | line segment                 | ray                          | written form of a<br>number  |
|   | line plot                    | real-world situation         | yard                         |
|   | long division                |                              |                              |
